Imagine you are a paleontologist from the year 65,000,000,000 A.D. and are studying ancient human behavior. An exciting dig site has just been uncovered outside a prehistoric school building. Look around for any artifacts laying on the ground (don’t pick them up or disturb them) and create a story that explains how that artifact came to be.

Artifacts can be:
- trash on the ground
- tracks

**Draw artifact:**
