Is the solution outside the cell hypertonic or hypotonic?

Hypertonic

Would the cell swell or shrink?

Shrink

Explain why water moves out towards a hypertonic solution:

______________________________

______________________________

______________________________
Would the cell membrane need facilitated diffusion or active transport to move solute **out** of the cell?

Facilitated diffusion

Would the cell membrane need facilitated diffusion or active transport to move solute **into** the cell?

Explain the difference between facilitated diffusion and active transport.
